IDENTIFIERS *Connecticut; Project Concern

ABSTRACT

The 11 tables and 7 figures provided in this report contain data, collected as of October 1982, about the distribution of minority group students and staff in Connecticut public schools. Student distributions are reported for type of community, grade, school district, and vocational-technical schools; staff distributions are reported for type of community, school district, and vocational-technical schools. Distribution data for Project Concern are reported along with growth rates for minority enrollment in towns with enrollments of 5 percent or more. Towns are ranked by number of minority students, and trends from 1973 to 1982 in the schools' minority populations are indicated. Figures depict the racial composition of the student population in the public schools and the percentage of minority students by towns in 1982. The remaining five figures focus on the years 1973-82, indicating minority group enrollment, minority and nonminority enrollment, minority and nonminority staff members, minority staff groupings, and percentages of minority pupils and staff members. INTRODUCTION

This report is the seventeenth annual report to present data on the distribution of minority group students in the public schools of Connecticut and the sixteenth to report minority staff data. In conformity with federal accounting standards of the National Center for Education Statistics, the five groups differentiated are White, Black, Hispanic, Asian American, and American Indian. In cases where ambiguities in the definitions may arise, students are counted according to their own indicated racial designation.

The first published report in this series presented data for April, 1966 on the number of Whites and nonwhites in individual classrooms. At that time, Spanish-speaking students were classified separately, but their numbers were included also in the count of either Blacks or Whites. A separate category for Spanish-speaking students began in the fall of 1968. In 1970, additional data collection began for the categories of American Indian and Asian American, but these are only explicitly itemized in the minority report series starting in the fall of 1977.

Until 1976, school districts with more than five percent minority enrollment reported detailed data at the classroom level. Since 1976, all districts have reported minority enrollments by grade and by school.

Bridgeport, Hartford, and New Haven participate in a program called "Project Concern," in which a limited number of disadvantaged, urban students are educated in the surrounding suburban school districts. Although Project Concern has the effect of reducing slightly the number of minority children reported in these cities, it does not affect the number reported in the participating suburbs because children in the program are reported separately. In 1982, Bridgeport sent 58 students, Hartford 735, and New Haven 100, to their respective suburbs. Data on Project Concern are presented in Table 5.

Changes in the format of this report that were introduced in 1977--e.g., district rankings of total, minority, and percent minority enrollment, and five- and one-year growth rates--are continued here. The 1980 standard metropolitan statistical areas of the U.S. Census Bureau were used to revise the earlier classification of towns into community types and form the new "emerging suburban" and "rural" categories for small towns. Data on grade enrollment were included for the first time in 1980. In 1981, the ten-year trend data reported in Table 11 were revised to include the state-operated vocational-technical schools.

Because of the availability of only two years of relevant data, students enrolled at the three academies--i.e., Gilbert Academy, Norwich Free Academy, and Woodstock Academy--are not included in the various trend analyses of this report.

Data for pupils in this report are drawn from Schedule 2 of the annual Racial Survey, Form ED-152 of the State Department of Education. For the first time this year, staff data are derived from the department's active staff file (Form TRB-3). In years prior to this report, grouped staff data were taken from a separate schedule of Form ED-152. In 1981, the racial/ethnic characteristics of certified staff members were collected both on Form ED-152 and Form TRB-3, and in 1982, the staff section of the ED-152 was dropped.

As shown in the table below, there were differences in the 1981 staff data reported from the two sources. Data taken from the staff file are considered to be more accurate because they were extracted from individual rather than grouped data. This assures that only full-time staff were included. As a side benefit, utilizing this data source has reduced the reporting requirements of school districts.

Form	American Indian & Asian American	Black	White	Hispanic	Total
ED-152 (1981)	81	1,635	37,410	570	39,696
Staff File (1981)	76	1,563	36,500	531	38,670

DEFINITIONS

Racial/Ethnic Categories

American Indian -- A person having origins in any of the original peoples of North America.

Asian American -- A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Pacific Islands.

Black -- A person having origins in any of the Black racial groups.

White - A person having origins in any of the original peoples of Europe, North Africa, the Middle East, or the Indian subcontinent.

Hispanic -- A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.

Growth Rate Calculations

Growth Rate (1-year) -- The percentage change from 1981 to 1982.

$$GR(1) = \left(\frac{\#1982}{\#1981} - 1 \right) \times 100\% = \frac{\text{Change over 81}}{\#1981} \times 100\%$$

Growth Rate (5-year) -- The average percentage change per year from 1977 to 1982. It is conceptually equivalent to a compound interest rate.

$$GR(5) = \left[\left(\frac{\#1982}{\#1977} \right)^{1/5} - 1 \right] \times 100\%$$

Community Types

Large City -- A town with a population of more than 100,000.

Fringe City -- A town contiguous to a large city, and with a population over 10,000.

Medium City -- A town with a population between 25,000 and 100,000, and not a Fringe City.

Small Town (Suburban) -- A town within a 1980 SMSA* with a population fewer than 25,000, and not a Fringe City.

Small Town (Emerging Suburban) -- A town with a population fewer than 25,000 included in a 1980 SMSA but not included in a 1970 SMSA.

Small Town (Rural) -- A town with a population fewer than 25,000 but not included in a SMSA.

---

*SMSA -- "Standard Metropolitan Statistical Area" is the U.S. Census Bureau's definition of a metropolitan area. It includes a central city (or "twin cities") of at least 50,000 people, and those contiguous towns that are socially and economically integrated with the central city. There are eleven SMSAs in Connecticut.

HIGHLIGHTS

Students

On October 1, 1982 there were 502,686 students in the Connecticut public schools; i.e, in the 165 public school districts, the 17 regional vocational-technical schools, E.O. Smith High School, and the three endowed and incorporated academies. Of these, 97,538 (or 19.4%) were minority students (see Table 1 and Table 3). Excluding the academies, there are 19,069 fewer students than a year earlier but only 4 fewer minorities.

Between kindergarten and grade 8, the proportion of minority students falls from 22.3% to 16.5% and again between grades 9 and 12 from 18.7% to 13.5%. Minority students made up 19.8% of the enrollment in the elementary grades (K-8) and 16.1% of the high school grades (9-12). Minority children accounted for (52.6%) of the students in public prekindergarten programs and 38.2% of students in special education programs (see Table 2).

In October, Connecticut's five large cities, enrolled 62.3% of all public school minority students (see Table 7). There were 128 districts with less than five percent minority enrollment and ten with more than 25 percent, the largest of which enrolled 86.6% minority students. The 37 districts with minority enrollment of five percent or more enrolled 89.4% of the state total of minority students (see Table 6 and Figure 2).

Excluding the academies, there was a decline in the number of students statewide of 18,886, and there was an increase of 93 minority students. Due mostly to the decrease in the overall student population, the minority percentage continued its rise to 19.5% from 18.8% a year ago and 15.9% five years ago. Of the 3,375 students enrolled at the three academies 237, or 7.0%, were minority students (see Table 1).

The number of Black students declined for the seventh consecutive year, while the number of students in other minority groups continued to rise. Blacks numbered 56,468 (58.0%) of all minority students, a decrease of 1,435 from last year. There were 33,815 Hispanic students (34.8%), an increase of 1,026 over last year; 6,138 Asian American (6.3%) an increase of 595 over 1981; and 880 American Indian (0.9%) a decrease of 93 from 1981 (see Tables 1 and 11).

Except for a small increase in emerging suburban towns, Black students decreased in all of Connecticut's community types. Contrasting with

this, Hispanics increased in all community types except for a small decrease in suburban towns. Asian Americans increased by 12.4% in the cities and 11.8% in emerging suburban towns (see Table 1).

The five-year, compounded growth rate for Connecticut's minority enrollment, from 1977 to 1982, was negligible (0.1%). For these five years the regional vocational-technical schools continued to show the highest minority growth rate, 9.2%, followed again by schools in small rural towns, 7.2%, and in fringe cities, 2.3% (see Table 1).

Excluding the academies, from 1981 to 1982 there was a decline in public school enrollment of 3.6%. All but 19 districts reported declines. White, nonhispanic enrollment was down 4.5%. Black enrollment showed its largest decline in ten years, 2.5% drop. Continuing the growth of prior years, Hispanic enrollment increased by 3.1%. Asian American enrollment increased strongly, by 10.7% (see Table 11).

The overall proportion of Blacks to public school students was 11.3% in 1982, compared to 9.4% in 1973. Hispanics represented 6.8% compared to 3.7% in 1973 (see Table 11, Figure 3, and Figure 4).

In the regional vocational-technical schools minorities represented 16.3% of the total 13,652 students (see Table 4). This percentage is essentially the same as the statewide percentage of minority students in grades 9-12 (16.1%). From 1977 to 1982 the number of minority students in the vocational-technical schools increased at an average annual rate of 9.2%, well above the five-year, average annual growth rate of 1.5% for the vocational-technical schools' total enrollment, and the statewide minority growth rate of 0.1% in all grades for the same five years. From 1981 to 1982 minorities enrolled at state-operated vocational-technical schools grew by 14.2%, or 278 students, as compared to a 12.5% increase, or 114 students the prior year.

Staff

On October 1, 1982 there were 37,726 professional staff in the Connecticut public schools (including E. O. Smith, the vocational-technical schools, and the three academies), of which 2,087, or 5.5%, were minority. Excluding the academies, there were 1,178 fewer certified staff than a year earlier, or a 3.0% decline, and 85 fewer minorities (see Tables 8 and 11).

There were small drops in minority group staff in each of the three categories of the small towns. The large cities, fringe cities and medium cities reduced minority staff levels from the year earlier by 54, 13, and 12, respectively, or 3.6%, 6.8%, and 4.0%. Five-year comparisons are not included in Table 8 because of the change in data collection in 1982 (descussed earlier in more detail in the introduction).

Excluding the three academies, of the 2,085 minority staff members statewide, 1,506 or 72.2% were Black, a decrease of 85 from 1981. There were 520 Hispanics, or 24.9% of the total, a decrease of 11 from 1981. In the combined categories of Asian American and American Indian, there were 59 staff members, or 2.8% of the total, a decrease of 17 from 1981 (see Table 8).

From 1981 to 1982 the number of minority staff in the vocational-technical schools increased by 2 to 47 (see Table 10). Minorities therefore increased to 4.6% of the schools' professional staff from 3.9% in 1981. This is compared to 5.6% for other Connecticut public schools.

Over the ten-year period covered by this report, the percentage of full-time minority staff members in Connecticut's public schools has increased from 4.4% in 1973 to 5.6% in 1982 (see Table 11 and Figure 7).
